

## ÜMİDE GÜLER ATSÜREN ANAOKULU E-GÜVENLİK PLANI

Today, the internet has brought many benefits and innovations to our lives as a part of social life. In addition to the benefits and facilities it brings, the unconscious use of the internet also contains threats to individual and social life. It requires shared responsibility for the protection of the rights and needs of children, young people and citizens, especially by educators, parents, media and all other relevant persons. As Nurcan Akpınar Primary School, we attach importance to awareness raising efforts for our children as well as being more conscious and safe internet users.

### **Connect to the future with confidence!...**

The INSAFE (European Safer Internet Network) network was established in 2004 within the scope of the Safe Internet Program established within the European Union Commission in 1999 in order to support children and young people to use the Internet safely with a certain responsibility and to protect them from illegal and harmful contents of the Internet. INSAFE, which was established to lead awareness-raising activities within the framework of conscious and safe use of the Internet, is today a network that coordinates the Safe Internet Center of 31 countries in Europe. In addition, the Safe Internet Day (GIG), organized by the INSAFE network in February of each year, has been held since 2004. Safe Internet Day activities were first started in 2010 in our country.

As Ümide Güler ATSÜREN Kindergarten, various activities related to Safe Internet Day were held within the scope of our eTwinning school activities. Visual awareness activities were carried out with school board, student and parent information seminars..

Digital technologies also offer extraordinary opportunities and opportunities for school age children. Children can easily and quickly access the information provided by the internet environment, fun games and similar activities. However, in addition to these wonderful opportunities provided by digital technologies, the danger that the child will encounter mental, mental and physical attacks and traps is an inestimable reality. For example, it is possible for a child on the internet to unintentionally enter an inappropriate site by watching

an ad that appears unintentionally or because of a wrong word that he will knowingly write to the search engine, or an image that provokes the child's curiosity will endanger him mentally, emotionally or physically. environments. The safest way to protect the child from the dangers briefly mentioned above is to keep him completely out of the internet environment. However, due to very rapidly developing digital technologies, unfortunately, it is not possible to keep the child away from the internet environment completely and banning it completely does not solve the problem. Moreover, due to environmental factors and parental attitudes, it has become impossible to completely ban internet environments and prevent access.

For this reason, it is imperative to find more effective measures to protect children from the dangers posed by the internet environment than trying to ban them completely.

With the pandemic process we are experiencing and the obligation of distance education, technology and internet have become a necessity.

There is no more effective way for children to protect themselves against the negative dangers of the Internet than to provide children with information, awareness and behavior, and to strive for this goal. This study happens in kindergartens only with family participation. With the projects we have done on the eTwinning portal, our families are able to access the internet together with computers, tablets or phones at specified times under the supervision of our families. In addition, activities with family participation are organized in our school to prevent children from spending hours on the internet. With these activities, parents find the opportunity to spend more quality time with their children. Children also spend less time on the Internet as they spend the necessary time with their parents. Our goal is permanent behavior change. For this reason, as a school policy, we are committed to protecting our students from the dangers and harms of the internet environment.

## **ABOUT OUR E-SECURITY CURRICULUM**

**1 Seminars are organized to develop knowledge, skills and attitudes about conscious and safe internet use in children...**

**2. All of our teachers provided updating the curriculum of subjects related to the conscious use of the internet, especially social media.**

**3. Emphasis is placed on electromagnetic pollution and internet security in schools affiliated to the Ministry of National Education.**

## **SAFETY PRECAUTIONS FOR CHILDREN**

**1. We carry out awareness raising activities for the family to ensure that they can provide child supervised, limited and purposeful use.**

**2. To promote and popularize packages related to the safe use of the internet**

**it is a state policy.**

**3. The use of secure internet package should be helped to spread.**

**4. Guidance is provided to encourage the use of limited internet packages in homes.**

**5. Priority is given to this subject in lessons in order to develop applications for use awareness.**

**6. The computers used in the family must be able to create different profiles according to the user and the secure internet service must be offered with different packages according to these profiles. Studies on this have been started.**

**7. Academics from the university are helped to raise the awareness of parents about control methods and technological possibilities, and to develop and spread the necessary applications.**

## **MOBILE PHONE USE**

**It was unanimously decided that teachers should use mobile phones as pedagogical tools when necessary, but not to use mobile phones by teachers and staff except in case of emergency during class hours.**

## SHOOTING AND PUBLISHING PHOTOS OR VIDEO AT OUR SCHOOL

### SCHOOL STAFF

1. During the school enrollment period, each parent signs a permit. In this permit, students' photographs can be found on the school official website, school magazine, newspaper, eTwinningportalı etc. In school promotions, parents should share pictures of their children in classrooms (to ensure safety) M.E.B. It allows it to be used in accordance with the circular numbered 2017/12.
2. No photographs or videos can be taken within the boundaries of the school or schoolyard by persons other than those assigned by the school administration and at times other than the activities and programs that the parents of the students want to know. This prohibition also applies if a student wishes to take photos and videos of another student.
3. Photographs and videos taken by the persons assigned by the school administration can only be published on the official web address and virtual environments of the school with the request and written approval of the relevant student's parent. Photos and videos about the student of the parent who does not give consent for the student are not published.
4. Precautions are taken to ensure that students who are not approved by their parents to take and broadcast photographs and videos do not experience psychological pressure during the shooting.

Personal information of students is not included in the pictures and videos published by the school staff.

**They attend annual trainings organized by EuropeanSchoolnet ([www.eun.org](http://www.eun.org)). They also participated in online seminars and online professional development events from the eTwinning professional development portal. The online safety (eSafety) policy will be formally provided and discussed for the participation of all employees and strengthened and emphasized as part of our responsibility to protect. It recognizes that parents /**

**caregivers have an important role to play so that children can become reliable and responsible users of the internet and digital technology. Parents' attention will be directed to the school's online safety (e-Safety) policy and expectations through newsletters, information articles, newsletters and the school website. A collaborative approach to online safety with parents at home and at school will be encouraged. It will include an emphasis on online safety at parent education or other activities with recommendations for safe internet use at home. They will organize social activities such as parent training, spending time together and sports days. Parents will be encouraged to read the School E Safety Policy and discuss its effects with their children. Information and guidance for parents on online safety will be provided to parents in a variety of formats. Parents, role model for their kids online.**

and their positive behavior will be encouraged. Our school celebrates an effective and comprehensive safe internet day. Active participation is provided to seminars, promotional posters and webinars throughout the week.

In 2018 and 2019, our school celebrated a safe internet day with effective and comprehensive parent support. During the week, active participation was provided to seminars, promotional posters and webinars. Safer Internet
